

# When was your last security assessment?

Are your plans up to date and responsive to today's risks?

**All businesses have risks. Those risks are constantly evolving.** To stay ahead of potential issues and mitigate negative impacts to the company's reputation, bottom line and license to operate, it's important to take inventory of risks on a regular basis and be willing to retool the response plan.

Summit helps clients conduct risk assessments, identifying threats, hazards and shortcomings of existing security measures. We work with customers to create plans for improving safety and security.

## STEP 1 Assessment

- ✓ **On-site inspection** of perimeter security, access points, and traffic flow
- ✓ **Review existing policies,** protocols, systems, and equipment
- ✓ **Review past events** and responses
- ✓ **Take inventory** of external threats stemming from localized issues, vendors, visitors, protestors, etc.

## STEP 2 Consultation

- ✓ **Document** risk profile
- ✓ **Identify** and test security solutions
- ✓ **Recommend** tools and technologies
- ✓ **Design** staffing protocols based on operations and planned events

## STEP 3 Staffing

- ✓ **Identify,** recruit and staff off-duty officers for advanced security
- ✓ **Manage** officer payments and tax documentation
- ✓ **Generous general liability coverage** for businesses; officers can sign up for occupational accident or workers comp insurance through Summit

### Sectors with rapidly evolving security needs

- Office buildings
- Critical infrastructure
- Manufacturing
- Construction
- Hotels
- Restaurants

With decades of local and national law enforcement experience, the Summit teams brings a fresh perspective to customer-specific challenges. Let us help you build a successful security program that provides your business with peace of mind.
